

Materials

- Scissors
- Tape/Glue
- One Head Piece
- One Body Piece
- Two Arm Pieces
- Two Feet Pieces

STEP-BY-STEP INSTRUCTIONS:

1. Get all the materials needed to start making BAYMIN. Scissor, tape/glue and printed PDF file with the required pieces and instructions.
2. Cut the solid black lines, fold the dotted lines and paste the shaded part to form the the HEAD.
3. Repeat Step 2 with the other parts.
4. After the you had formed all the parts, combine it using tape/glue. Put a tape/glue in the HEAD with a shade part and attach it to the specified part of the body. Use the picture of output as a reference.
5. Repeat Step 4 with the other parts: left arm, right arm, left foot, right foot.
6. And when you have done attaching all the different parts to the body. Hurray! You got yourself a mini-personal healthcare robot now.
