

Mini 5V-30V DC PWM Speed Controller Electrical Motor Control or LED Dimmer

ZS-X4A

Specification:

- Operating voltage: DC 5-30V
- Control power: 90W (maximum)
- Quiescent current: 0.015A (standby)
- PWM duty cycle: 1% -100%
- PWM frequency: 10khz
- Size: 29mm*23mm (excluding handles)
- Total height: 15mm

Feature:

- PWM DC motor speed controller is a very safe product.
- When the situation is overcurrent, it will disconnect by itself. after cooling off a few seconds, the fuse will recovery automatically.
- With high voltage and high current resettable fuse
- Mini but useful

Package included:

- 1 x PWM DC motor speed controller

Application:

- DC Brush motor speed adjustment, Robotic, Car, Boat, Fan, LED Dimmer, etc...
