

WUHAN HOOK V2

ALL YOU NEED IS A 5MM ALLEN KEY, BIC LIGHTER, AND 3D PRINTER

Prevent viral transmission via shared surfaces with this simple self-disinfecting wand

How it works

Before *and* after using the hook to touch pin pads, open doors, etc., use the lighter to flame the hook, which disinfects the hook surface preventing unnecessary viral transmission.

Note: this is a preventative measure only, wash your hands!
