

THE COFFIN TREAT

WANT SOME CANDY?
SO COME ON, PLAY AND SOLVE THE MYSTERIES
OF THE COFFIN...

The game consists of solving the different tests using the sensors and buttons you will find as you progress, in order to open the last door and be able to take the candies.

Track: remember to follow the three tests in order to unlock the enigmas.

Good Luck!

1 BUTTON CODE

Solve this enigma and you will pass to the next test. The solution will give you the code to unlock the first mystery.

$$\begin{aligned} 7 * \blacklozenge &= \blacktriangleright \\ \blacktriangleright - 4 &= \blacksquare \\ \blacksquare + 2 &= 5 \end{aligned}$$

$$\begin{array}{r} \blacksquare 303 \\ 1 \blacktriangleright 84 \\ - \blacklozenge 81 \\ \hline a b c d \longrightarrow _ _ _ _ \end{array}$$

2 LIGHT IS THE WAY

You have unlocked the first door, do you want to continue?

If you want to continue you have to be prepared to play with 2 sensors. In this test you will have to put yourself in a concrete distance in front of the coffin and at the same time flash with the light wherever you think you have to illuminate.

Search and try until you get out of the mystery!

3 LET'S PRESS AND REGULATE

Finally you have arrived to the last test!

Congratulations on getting here, do you think you will be able to open the last gate?

In this test we will only give you two instructions. Basically try to figure out what the title of this test means and try to play with what you have in sight.
