LED Clip/Pin

You Will Need: • Conductive thread

- Cotton thread
- Coin cell battery
- Barrette or pin back
- Felt piece (to hold battery)

٠

Place your LED. Using conductive

thread, secure the legs. Remember,

use two different threads and don't

let them touch!

Before sewing your LEDs in place, bend the legs out to each side and twist them into spirals. Be sure to remember or mark positive and negative legs!

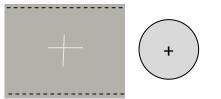

2

2 4

Use a small piece of felt to make a battery holder. With conductive thread, sew a pad on each side. These will touch the battery.

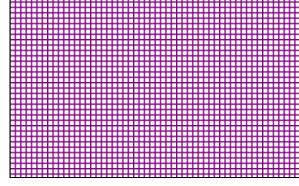

With cotton thread, sew two sides together to make a pocket for the battery. You may want to mark the positive and negative sides.

3 Cut, fold or gather the fabric of your choice into your desired shape. If necessary, secure it with cotton thread.

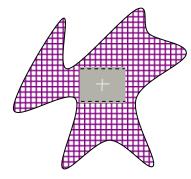

• Fabric

LED lights

On the back of your fabric creation , you will attach your battery. Attach your conductive threads positive to positive, negative to negative, to your battery pack.

6 Affix your creation to your barrette or pin. Wear it with pride!
