

## The all-natural sport!

Without noise, pollution or danger, Surfbike is a new way to enjoy aquatic sports.

Designed for lovers of nature and the outdoors, Surfbike is less strenuous than a regular bike. Force is easily applied to the pedals, without any impact. The rider decides how much pressure will be applied.

Pierre-Louis Parant, the inventor

## Surfbike is easy to ride

You only need a few minutes to be perfectly comfortable and in full control. It's as easy as riding a regular bike.

With the Surfbike you can easily maintain a speed of 10 km per hour (6 miles per hour), which is faster than the foot-pedal craft, canoe or kayak.

The saddle is adjustable and can be adapted for kids.

## Few Components to Assemble

The Surfbike consists of a monocoque board, a steering system and a crankset. These three basic components are easy to carry and to assemble — without tools.

Fives minutes is all you need.

Steering system

Crankset

Surfbike stability is astonishing

Several rental centers already offer Surf bikes. The public's response has been overwhelming. Users are stunned by the simplicity of the concept and hours of fun Surf bikes provide.

**STURDINESS-TESTED DURING RENTALS**

Surfbike stability is astonishing in the waves. You could even venture without risk on the ocean!
