- Width: 28.5'' or 0.72 meters
- Depth: 8.5'' or 0.22 meters
- Shipping weight: 80 lb. or 31 kg

Accessories and technical specifications

Cruz Wing

Cruz Wing is a lightweight and easily-installed accessory designed for long outings and occasional stops on the water. While riding in an upright

position, you can discover a new way to view the many wonders of nature while relaxing and enjoying the many benefits of riding a Surfbike.

Surf Seat

This simple accessory can turn your Surfbike into a kayak!

Remove the propulsion and steering units and install the Surf Seat. In seconds, the transformation is complete! You have an entirely new sport! Combining 2 sports in 1, Surf Seat provides you many additional hours of fun! Surfbike and Surf Seat, all you need for exciting upper and lower body workouts!

Cruz Connection

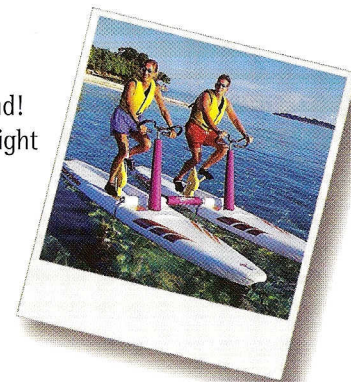

Add this exciting accessory to your Surfbike!

All you need are 2 Surfbikes and a friend! With the Cruz Connection – a light weight tubular attachment – Surfbike gains new dimensions. Just clip in the bar and off you go!

The Surfbike is:

Fast

SURFBIKE makes efficient use of human strength, given that a person's legs have greater resistance and develop up to twice as much power than the arms. In addition, the mechanical advantage offered by the propeller enables a rider to go much faster than they would in a canoe, kayak or pedal boat.

Environmentally-friendly

Fuelled by the push of a pedal, the SURFBIKE poses no threat to the environment. It puts an end to exhaust and noise pollution in and around our waters.

Unique

The SURFBIKE has many uses: recreation, fitness, transportation, etc. It is perfect for all ages. The SURFBIKE is easy to carry. It is virtually maintenance-free and easy to store.
