

# PaperPetShop™

papercraft templates

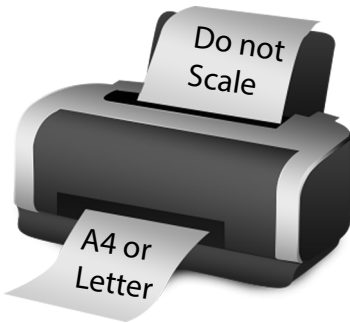

## WHALE

[www.paperpetshop.com](http://www.paperpetshop.com)

## Materials Required

A4 or Letter printer paper or card  
Scissors  
Cello tape  
Paper glue  
Access to Printer

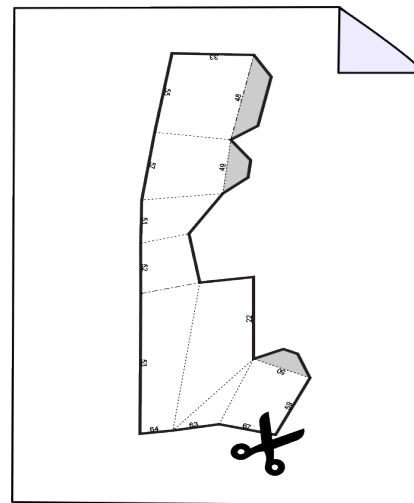

## STEP 1 - Print the Papercraft template

Print on the following paper sizes  
A4 (210mm X 297mm) or US Letter (8½" X 11"). One can stick light printer paper onto card to make the model more rigid.

Printer settings :  
In scale options, select "Actual size".  
Do not check "Scale to fit page".

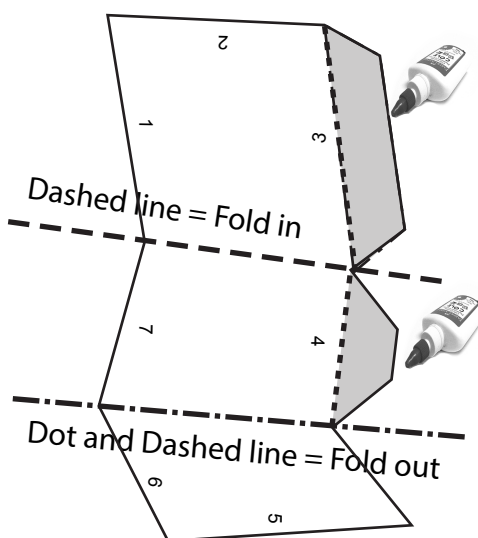

## STEP 2 - Cut along the solid lines with a scissors

Cut the template out, following the solid lines with the scissors. Be careful and get assistance if required.

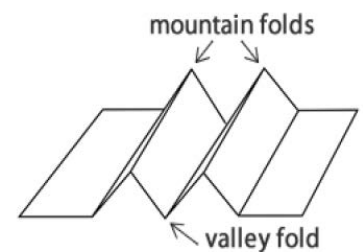

## STEP 3 - Fold along the dotted lines

One can score along the dotted line with a blunt object to make the paper easier to fold. I score the dotted lines using a pizza slicing wheel. Dashed lines are folded in and dot and dashed lines are folded out

Cut line —————  
Valley fold line - - - - -  
Mountain fold line - . - . - .

## STEP 4 - Glue the tabs to the edges with the same number

When glueing two sections, hold the glued tab in position for a few seconds . One can use cello tape, to hold the tabs in place while the glue dries.
