

FABLAB
Catania

The free project by Fablab Catania and designer Carmen Russo was very successful.

The files were downloaded more than 3900 times. Unfortunately, the project was

copied by a Ligurian company and the masks sold at a high price. to have very

embittered the author and the team that collaborated on the project, led to the

decision to always release the files free of charge but requesting the data of those who

want them. It is forbidden to trade in this project. Anyone who wishes can request files
