

## QUICK AND EASY GUIDE ON HOW TO MAKE A LEATHER WATER BOTTLE HOLDER

**1. Start with a piece of leather roughly 6 1/4" x 12 1/2".**

**2. Cut off 1 1/4" strips as shown to end up with a piece that is 5" x 10". This will be the main piece for wrapping the water bottle.**

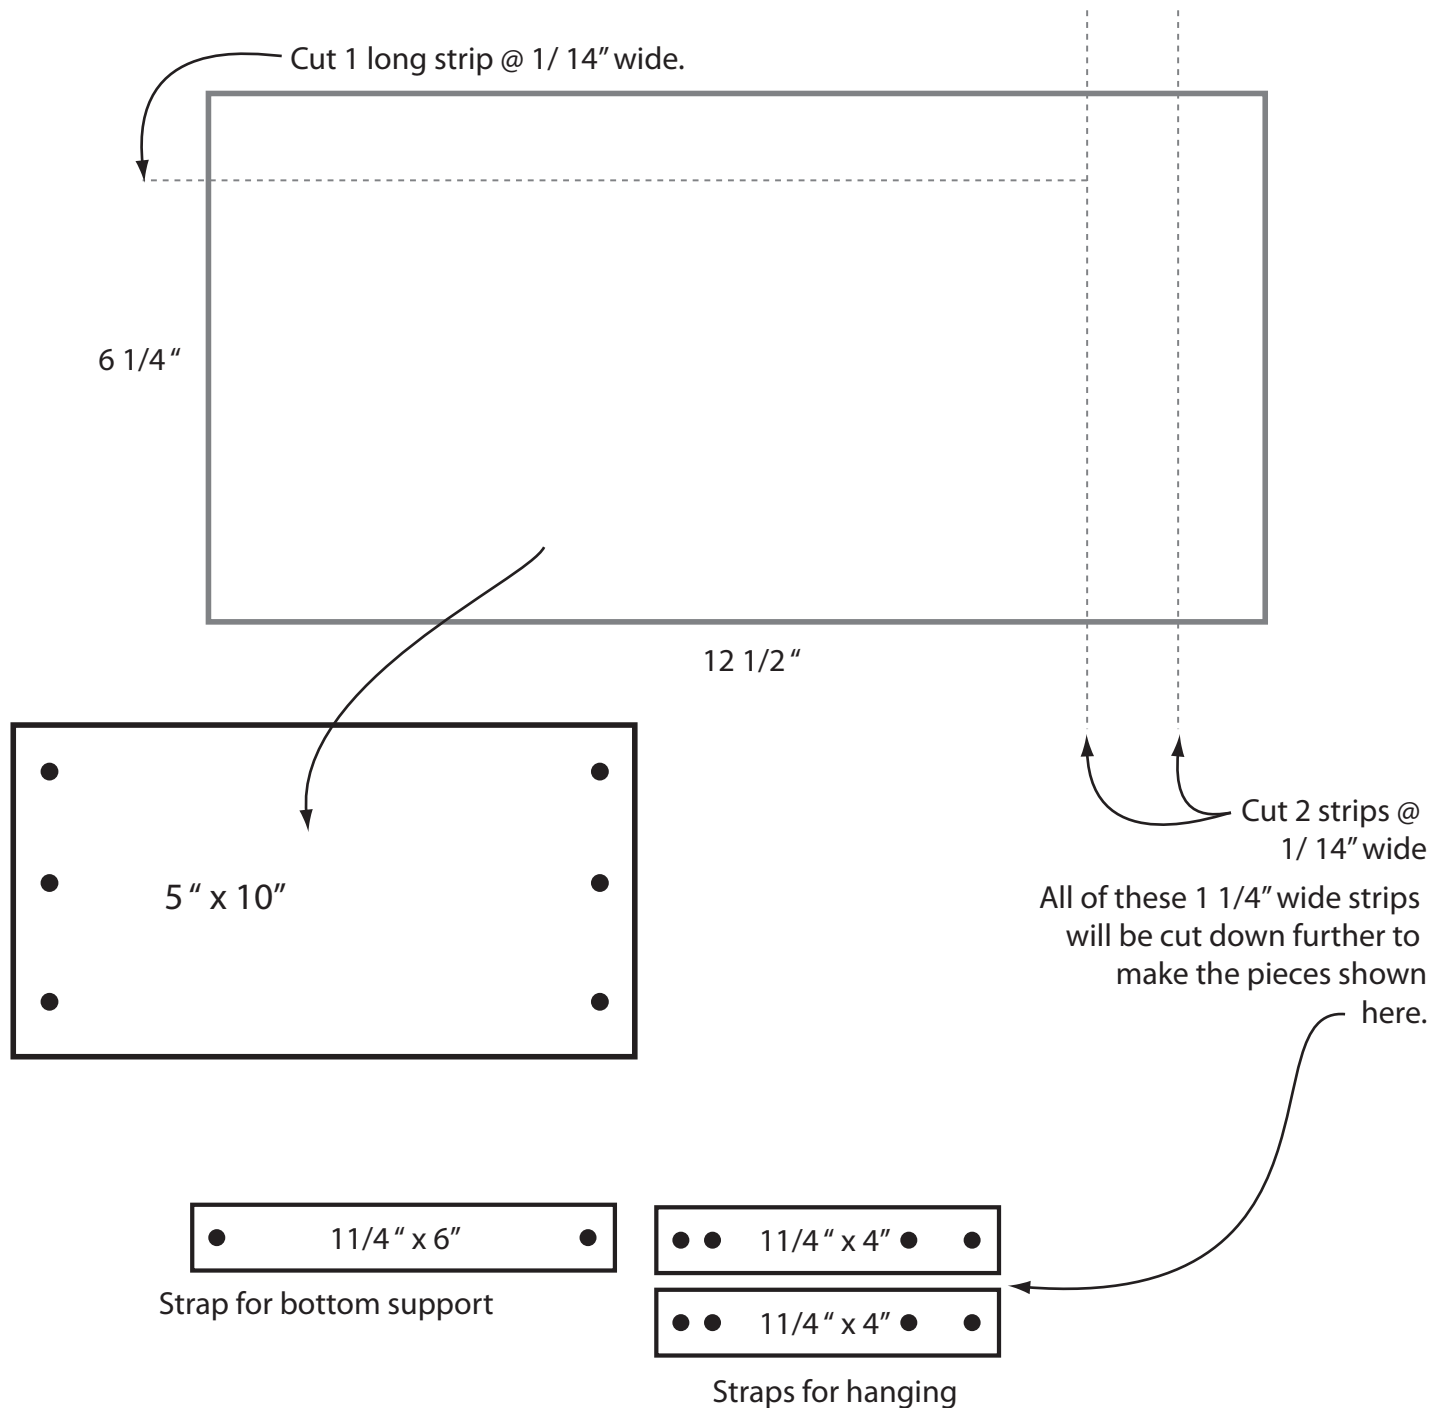

**3. Cut down the 1 1/4" strips so that you have the 3 strips shown at the bottom. One will be the bottom support, the other two will be used at the top for hanging the holder from the shoulder strap.**

**4. Mark holes and rivet main piece and bottom strap.**

**5. Add loops to short straps for hanging and rivet.**

**6. Attach shoulder strap and rivet.**
