Side

Side

Top

Base plate

Cutting list

10mm plywood

Base plate 50cm x 15cm

Outer side pieces 15cm x 9cm

Inner side pieces 15cm x 8cm

Top is cut to size this allows you to adjust leg spacing

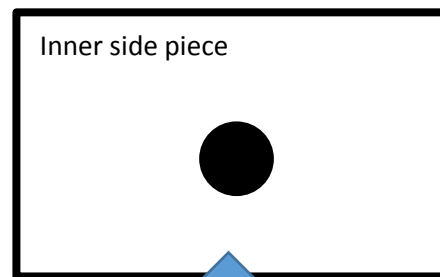

Materials used

10mm ply

2 x mini rolling pins from Wilkinson's

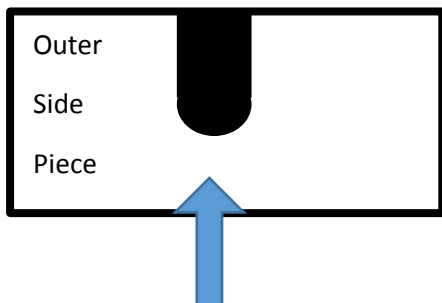

Wood glue

Tack nails (to hold while the glue dries)

Inner side piece

Drill a hole so that
The rolling pin is only
Just elevated above
The bottom plate (all
4 pieces)

Outer
Side
Piece

On the two outer pieces cut a channel so you can drop in the rolling pin handle

Prototype - outer sides are too high to remove the rolling pins

The two outer side pieces could do with extra braces for additional strength, I will box off the middle section for a cleaner look

A good sanding and then either stained, oiled or painted for a much better finished look
