

Warm-up Activity

The circle/cosmogram can be found in the light cone from [special and general relativity](#), which are physics theories by [Albert Einstein](#) that represents the path that a flash of light, traveling in all directions, would take through [spacetime](#).

As a warm up, split into small groups of 3-4. Look at and discuss the Spacetime Brainstorming Chart (above) and respond to the following questions:

- **Where are you in the present moment ("here and now")?**
- **How does the past influence you?**
- **What can you do now to influence the future?**

****Be sure to take notes and sketch out ideas while discussing these questions.**
