

Moss-facades from Vertiko GmbH

- hypnum Moos best suited for vertical surfaces
- moss glued to aluminum bonded panel
- if possible, moss should be in the shadow
- may dry out
- facade is green in winter and brown in Summer

Watering:

- moss only tolerates rainwater (no tap water)
- moss takes humidity from the air
- nozzles increase the humidity
- nozzles have a reach of 1m²
- water with 3bar pressure 10min a day (or two times 5min)
- one nozzle reaches 0.05l per min
- should have a 60l waterreservoir (3 months)
- no watering over 24°C
